Personal Website

- Addressed customer inquiries and concerns, enhancing their shopping experience.

Apr – Sep 2022   Florist Odesa, Odesa
Call Centre Operator (full-time)

- Assisted 30+ customers daily in selecting the perfect bouquet solutions, showcasing strong product knowledge.
- Diligently maintained precise and up-to-date customer information, ensuring error-free data entry and contributing to effective customer relationship management.

Projects

boutme - GitHub
> (GoLang, Vue, Javascript, SQL, Echo, Sqlc, Postgresql, Goose, Docker)
> boutme is an advanced, dynamic portfolio platform crafted to showcase professional talents and projects in an interactive manner. It is equipped with admin panel features, providing control over content management and site customization.

CRM System – GitHub
> (Java, Spring MVC, PostgreSQL, Liquibase, JPA)
> The CRM system project was developed for James Joseph (Estate Planning) company as a university project in a team. Consequently, inherited proposed design and some of the crucial and unique functionality.

Huchno - GitHub
> (Python, FastAPI, PostgreSQL, MongoDB, Redis, SQLAlchemy, Docker, Pytest)
> Huchno (Ukrainian for "loudly") is a ground-breaking mobile app that allows you to track your friends' locations and discover the music they're currently listening to. With real-time insights into their preferences and moods, Huchno creates a unique opportunity to bond through music while exploring the world.

TikTok-Reddit Bot - GitHub
> (Python, PostgreSQL, SQLAlchemy, Reddit API)
> This bot was created to create TikTok videos from Reddit posts, inspired by videos on TikTok, where the bot voices posts from Reddit in the background of gameplay.

Activities

- Headed the guard of honour in respect of fallen in World War 2.
- Member of the Ukrainian Society at Anglia Ruskin University.
- Member of the Institution of Engineering and Technology.

Languages

- English (fluent)
- Ukrainian (native)
- Russian (native)
